

Emergency Medical Responder introduces individuals into the field of emergency medicine. This course is not a prerequisite for EMT-Basic but provides a tremendous foundation for those interested in the medical profession.

The course content includes, but is not limited to, introduction into EMS, basic airway management, patient assessment, basic illnesses and injuries, pediatrics, and basic EMS operations

Students will be able to perform the following skills during lab practices:

- Scene size-up
- Airway management, including oxygen administration and use of a bag-valve mask
- Patient assessments, including initial and a focused history for medical and trauma patients
- Basic recognition and care for medical and trauma emergencies
- AHA BLS Healthcare Provider CPR
- Basic ambulance operations

This course offers certification by the Colorado Division of Fire Prevention & Control, formerly known as the Colorado Division of Fire Safety, as a First Responder. A course average of an 80% must be met including an 80% on the final written exam. We currently do not offer NREMT certification. The advantage of obtaining the first responder certification, is that it affords you an opportunity of becoming a volunteer firefighter with various fire and rescue agencies. It also provides a fantastic introduction for those interested in taking an EMT Basic course or pursuing a career in medicine.

Attendance Policy: We have a strict attendance policy in accordance with Colorado Division of Fire Prevention & Control and the DOT standards in which students are not allowed to miss more than 6 hours of class. Students missing more than the allotted time will be not allowed to continue regardless of the circumstance, and will be immediately withdrawn from the class. It's very important for students to understand this unconditional requirement prior to enrolling.
