CAN WE SEE YOUR HOUSE ADDRESS NUMBERS ON YOUR STREET AND OR HOUSE??

If you are located in the Evergreen Fire Protection District, please read...

Dear Neighbors,

When you have lived at the same address for a number of years, it's easy to be on autopilot and not pay attention to your house address sign. For Police Officers, EMS and Fire Rescue that may be responding to your house in the event of an emergency, your house numbers are what they are looking for. Make it a point to have your address numbers clearly visible. If needed, please upgrade your signs.

We have a preferred style of sign that we feel is most visible. It should be approximately 6" x 18" and have numbers approximately 3 inch high. The sign material should be heavy gauge aluminum, and green in color with white reflective numbers on both sides.

There are multiple vendors that make this type of sign, please feel free to explore the different companies on the internet. Here are a few that we feel will provide a quality product.

- www.pride911signs.com
- www.safetysign.com
- www.smartsign.com

Please take a moment today to check the condition and visibility of your address sign so that we can find you, should you need assistance from First Responders in the future!!

If you need assistance with this, please contact us for more information.

Thank you,

Mike Weege, Fire Chief
